WEIGHED BY: Beck's Hybrids-Kurt R. Bandel

"This is a testimony to the value of Sure Gro treated soybeans. We had tough conditions early in the growing season but the Sure Gro beans just performed better.

Beck 323RR's were fantastic this year. One 62 acre field averaged 64 Bu./A. and a 109 acre field ran 59 Bu./A.

Anytime you average over 60 bushel beans you know it's putting money in your pocket. We are very happy with the performance of Beck's soybeans."

 WEIGHED BY: Beck's Hybrids-Tom Wallace

“Our first experience with Beck’s was in the 2004 growing season. We have been very impressed with the performance and standability of 5959 and 6197.

We also planted Beck’s Sure Gro soybeans and were very satisfied with the overall plant health. Sure Gro definitely showed an advantage with improved emergence and seedling vigor.”

Kevin Probst
Effingham, IL
