Checker Average(BECK 5166):

17.5 -- 56.5 -- 239.6 --

*Yield = Bushels per acre corrected to 15% moisture.

WEIGHED BY: Beck's Hybrids-Ben Grimme, Brad Downing

"I had wanted to switch to Beck's for several years, but I depend on the value of High Extractable Starch (HES) programs. HES programs just recently became available through Beck's. I like the fact that Beck's is a locally owned family company that has been around for several generations. Having a dealer right down the road and having access to Beck's Practical Farm Research information helps me to make more informed decisions on hybrid choices. It is important that I can come to Beck's Field Day and talk to any member of their management team and feel that they care about my farm. Beck's has the flexibility to make quick decisions that may help me add value to my bottom line."
